Engineered Steel Division

 **DROIT**<sup>TM</sup>  
Steel Building System

## **EXODUS** Group of Industries

Exodus Group of Industries founded in 1986, an Industrial Entity known for its futuristic approach and quality products. We started with manufacturing facilities for knitted fabrics and its dyeing. And gradually developed its infrastructure to compete and serve the world with innovative products like mercerized & singed hosiery fabrics etc. We later diversified into the field of engineered steel & garments. Exodus Group has 3 verticals.

**Exodus Knitwear** – Knitted Fabrics Division  
( Manufacturing Facility Area 3 lakh sqft – Capacity 18 million mtr p.a. )

**Exodus Ispat** – Engineered Steel Division  
( Manufacturing Facility Area 2 lakh sqft – Capacity 18000 mt p.a. )

**Exodus Futura Knit** – Garments Division  
( Manufacturing Facility Area 2 lakh sqft – Capacity 10 million pieces p.a. )

Each of its verticals are market leaders & innovators in their industry and have earned considerable market share in short span of time.

## Exodus Ispat - An Overview

Building the lifeline of tomorrow

Exodus Ispat - is part of the Exodus Group of companies (Estd. 1986), which is into manufacturing of engineered steel products. We are the leading manufacturer of Pre Engineered Steel Buildings and Roofing Systems. We are an ISO 9001 certified company & a member of the Indian Green Building Council.

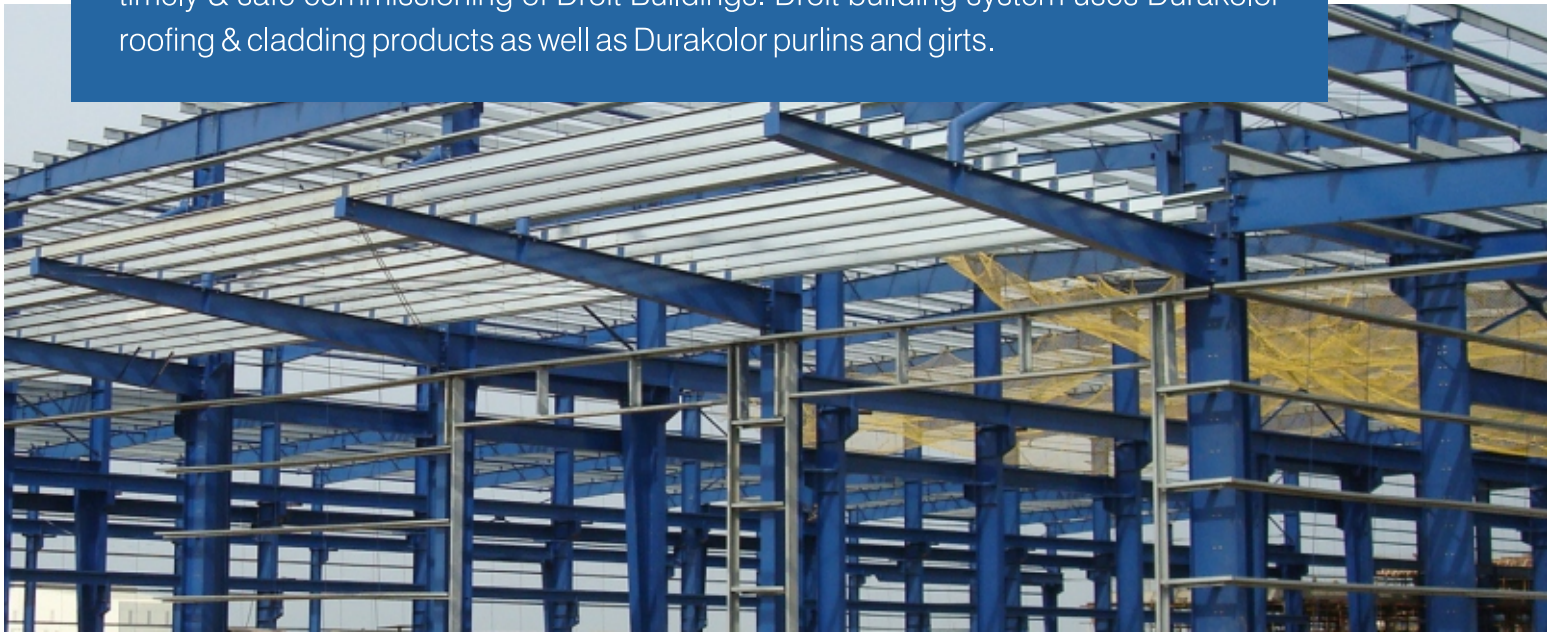

We have in house team of professionals & facilities confirming to international quality standards. This enables us to give our customers world-class products. It is because of our focus on quality and the way we serve our customers we have been able to receive the patronage of customers like the Indian Railways, MES, PWD etc. Our products have found its application in various industries, ranging from Steel, Cement, Packaging, Plastics, Warehousing & Housing etc.

# Droit Pre-engineered Steel Building System

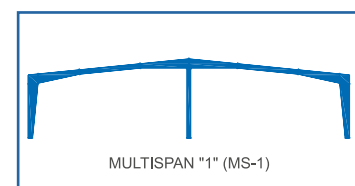

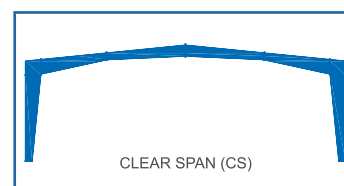

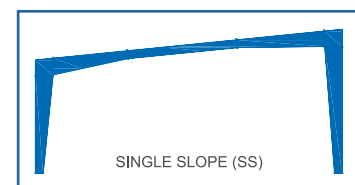

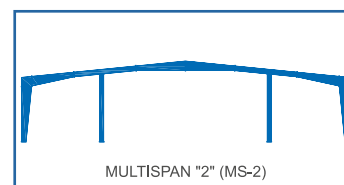

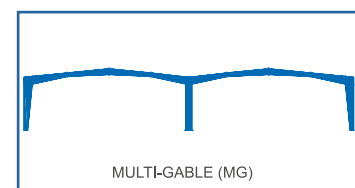

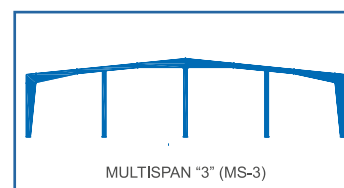

Offers customers freedom from complexity of building a shed. It offers one stop solution to its client, starting from designing to commissioning. Droit's team of professional engineers provide its customers economical and durable building solutions. Customers can focus on their core business once they handover their building's construction responsibility to Droit.

Our buildings are designed using the latest national & international design code & standards for the most optimized functionalities. We use high-grade steel products with full traceability, which goes through QC before production. The manufacturing facility confirms to the IS welding codes & quality assurance plans. The dedicated team of logistic partners ensures on time delivery & Our technical execution team ensures timely & safe commissioning of Droit Buildings. Droit building system uses Durakolor roofing & cladding products as well as Durakolor purlins and girts.

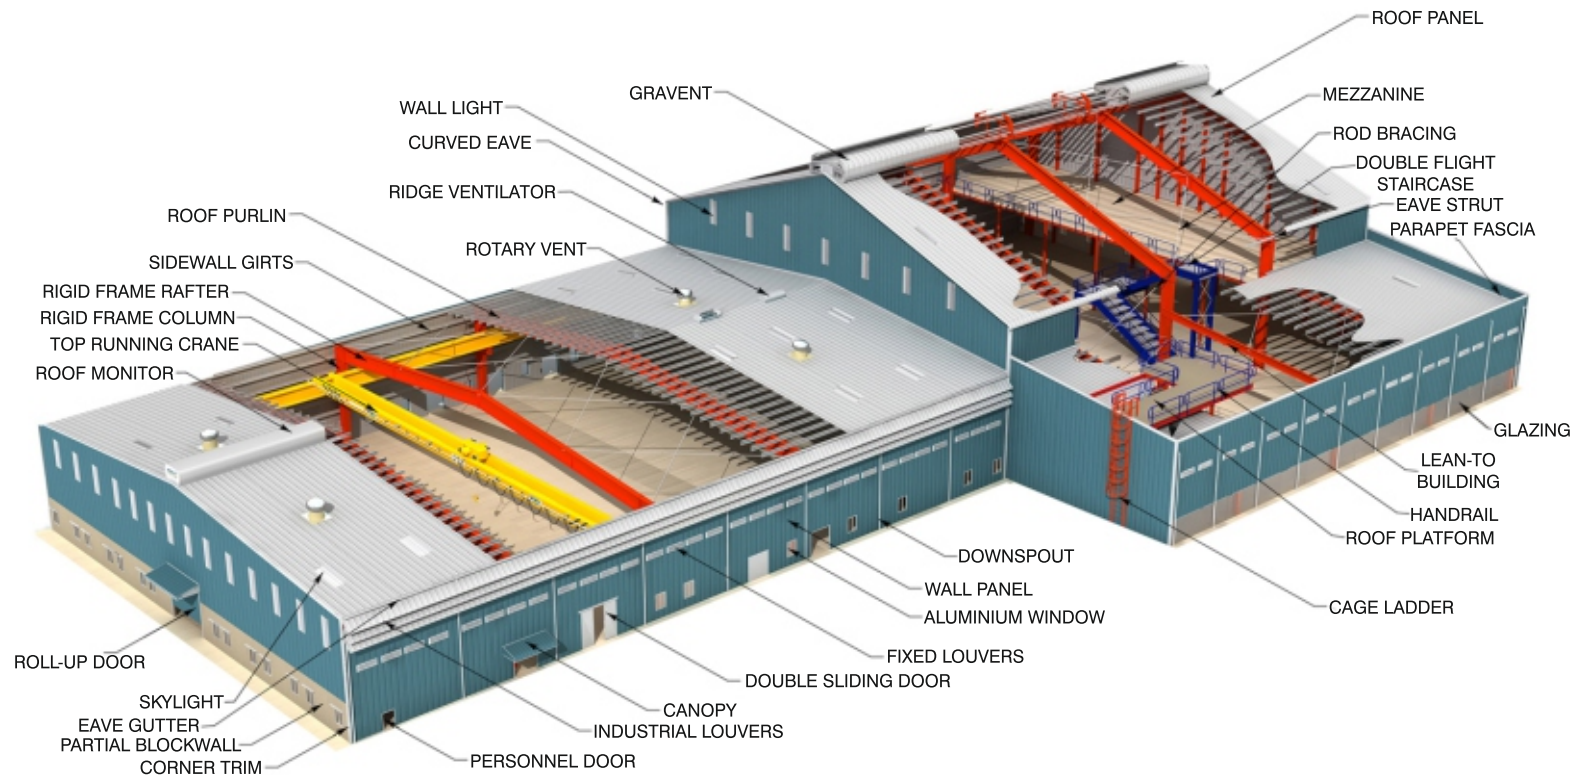

## Advantage

- Single Source Responsibility
- Reduced Construction Time
- Larger Spans
- Quick & Easy Installation
- Economical
- Quality Controlled Product
- Aesthetically Appealing
- Energy Efficient Roofing & Cladding System
- Environment Friendly – Recyclable Product
- Flexibility of Expansion
- Practically Maintenance Free

# Pre-Engineered Building System

Pre-engineered steel buildings are designed and fabricated to client's specific requirements in accordance with the industry relevant standards. A Pre-engineered steel building consists of four major groups of components viz. primary members, secondary members, metal roofing/wall cladding and connection fasteners. These components work compatibly together to produce the most optimal and economic design. The fabrication / roll-forming of these components are carried out in our factory under strict quality control. These are assembled and erected at site to give an aesthetically pleasing building.

## Droit – Lite

Is a unique light weight steel building system suitable for small sheds, residential houses, site offices, schools, hospitals, roof top sheds etc. These sheds are made from high strength cold formed steel sections which are pre-galvanized, making them more durable. Buildings made from this system are fire resistant and strong.

It uses Durakolor Roofing & Cladding System for longer life. The installation system is very easy as all components & parts are marked and are assembled using only nuts and bolts. It can be installed even by less skilled workers. It is light weight, thus it saves foundation cost and it is easy to transport even to remote areas.

### Advantage

- Light Weight & Strong
- Non Toxic & Non Organic
- Fire Resistant
- Earth Quake Resistant
- Durable
- Quick & Easy Installation
- Easy to transport
- Aesthetically pleasing
- Reduced Construction Time & Cost

## Other Products & Accessories

### Roofing & Cladding

Droit pre-engineered buildings are complemented by our DURAKOLOR range of roofing and cladding systems. We use the time tested technology of galvalume which contains 55% aluminium & 43.5% zinc. The product is made of high tensile steel, which are coated with VXP paint which suits varied industrial requirements. It comes in standard industrial & tile profiles. It also comes in the standing seam profiles, which comes with a 10-year leak proof warranty.

### Insulated Roofing & Cladding

Droit offers insulated roof and wall cladding solution, which have high thermal resistance. We use puf, mineral wool or polyethylene based insulation as per client specification. These are ideally used in cold storages or places where ambient temperature needs to be maintained. It also increases the energy efficiency of the building.

### Other Components & Accessories:

- Deck Sheets
- Louvers
- Ridge Ventilators
- Skylight
- Bead Mastic & Sealers etc

## Quality & Customer Service

Droit Steel Buildings team has kept Quality as its prime focus, which enables it to deliver and serve its customers to their fullest satisfaction. Its buildings are designed into simpler structures without sacrificing the utility of the building. Exodus is certified as an ISO 9001:2008 company since 2011 by SGS. We adopt a comprehensive quality assurance plan complying with international standards.

### Feature:

- Standard Operational Procedures
- Raw Material Inspection & Traceability
- Job tracking
- Job Scheduling
- Inspection during production
- Non-Destructive Tests
- Pre Dispatch Inspection
- Standard Execution Procedures
- On-time delivery
- Customer Care Department
